## **DETAILED ACTION**

## Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - Claims 1-15, drawn to a semiconductor device, either configured to be an input or output interface or driver for display section, classified in class 257, subclass 99.
  - Claims 16-21, drawn to electronic equipment comprising said semiconductor device, classified in class 370, subclass 535.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the electronic equipment as claimed can be composed of a device that is not necessarily a semiconductor device, such as electronic equipment based on liquid crystal as the material basis.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, the fields

Application/Control Number: 09/981,734

Art Unit: 2826

of search are not co-extensive and separate examination would be require, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 FR 1.143).

In the event Applicant elects the semiconductor device rather than the electronic equipment this application contains claims directed to the following patentably distinct species of the claimed invention: a semiconductor device configured as input interface (Figure 1a), a semiconductor device configured as output interface (Figure 1b), and a semiconductor device configured as display (Figure 2).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim appears to be generic.

## Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Johannes P Mondt whose telephone number is 703-306-0531. The examiner can normally be reached on 8:00 - 18:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nathan J Flynn can be reached on 703-308-6601. The fax phone numbers
